(54) A digital interactive system for providing full interactivity with live programming events

(57) The present invention relates to an interactive digital system (1) enabling viewers full and active participation in experiencing a live broadcast event. Particularly, the presentation of the live event is personalized for the viewer through the provision of options, including multiple video streams, associated with different cam-

era angles, for example, and integrated audio and graphic segments. Further, information obtained from related Web sites can be integrated into the live program.
